EXPERIENCE

Front-End Developer, 2022 - Present
Gore

Worked on the company's website. With the help of the angular, created the user interface/UX and the logical part of the site. I worked on a calculator where complex logic and requests to the server for data for the calculator were implemented. I used node.js and the nest framework for the backend.

Front-End Developer, 2020 - 2022
Freelance

Implementing websites and mobile applications with a responsive, mobile-first approach from concept through deployment, while constantly maintaining, optimizing, troubleshooting, and improving websites for various clients.

Quality Assurance Tester, 2018 - 2020
uTest, Testbirds, testIO

Finding and reporting bugs and glitches, through manual testing. Ensuring that products, applications and systems work correctly and that user expectations are met during the testing process.

EDUCATION

Front-End Development / JavaScript, 2021 - 2022
The Rolling Scopes School *(Online)*

Responsive Web Design, JavaScript Algorithms & Data Structures, 2019
FreeCode Camp *(Online)*

Certified Personal Trainer, 2014
