ABOUT ME

I am a passionate Frontend Angular Developer who thrives on all things related to coding. My enthusiasm for technology drives me to continuously learn and adapt to new trends and tools, ensuring that I stay at the forefront of the industry. I take pride in my hard work and dedication, approaching every project with a commitment to excellence and a keen eye for detail.

My journey in frontend development is fueled by a deep curiosity and a love for problem-solving, which motivates me to tackle complex challenges and deliver innovative solutions. Whether it's mastering the latest Angular features, optimizing user interfaces, or crafting responsive designs, I am always eager to dive into new technologies and methodologies.

EXPERIENCE

Angular Front-End developer, 2022 -

Gore

As a Frontend Angular Developer, I worked with Angular versions 15, 16, and 17 on the company website. One of my key projects was developing a cloud products calculator, which involved complex logic and multiple user interactions. I utilized a range of technologies, including RxJS, Strapi, Scully, and Nest.js with TypeORM and PostgreSQL, to generate data from JSON prices for the frontend and integrate it into the calculator.

Additionally, I used Figma designs to create numerous pages, incorporating various logics and interactions. These pages were responsive, ensuring optimal functionality and user experience across several devices. My role required close collaboration with the design team to accurately translate their visions into code, along with continuous optimization and debugging to enhance performance and user engagement.

Front-End developer, 2020 - 2022

Freelancer

As a Frontend Freelance Developer, I worked with several clients at various stages of development, creating a range of websites including blogs, online shops, and landing pages. Occasionally, I also designed elements for the sites to ensure they were visually appealing and functional.

I developed all websites to be fully responsive, ensuring an optimal user experience across desktop, laptop, and mobile devices. For these projects, I utilized various technologies and tools, including JavaScript, SCSS, Bootstrap, WordPress, OpenCart, and jQuery.

QA Tester, 2018 - 2020

Freelancer

As a Manual QA Tester, I was responsible for identifying and reporting errors and bugs through manual testing. My duties included:

Error Identification: Conducting tests to detect defects and issues in products, applications, and systems.
Bug Reporting: Documenting and communicating errors with clear information for correction.
Quality Assurance: Ensuring products met user expectations and functioned correctly.
Test Documentation: Creating and maintaining test cases and plans for comprehensive coverage.
My role was crucial in ensuring the quality and reliability of software.

INTERESTS

In my free time, I enjoy various activities that enrich my life and help me stay balanced. I am passionate about reading books, as it allows me to explore new worlds and expand my knowledge. Music is an essential part of my life; I enjoy listening to different genres to relax or motivate myself during work.

Additionally, I love going to the gym to stay fit and improve my overall well-being. I am a big fan of movies, enjoying both classic films and the latest releases. Of course, coding remains one of my main passions; I am always looking for new challenges and opportunities to learn and enhance my programming skills.

MENTOR

The Rolling Scopes School (Online)

Posición: Mentor de Frontend Angular Developer

In my role as a mentor at The Rolling Scopes School, I dedicated myself to supporting and guiding students on their path to becoming frontend developers specializing in Angular. My responsibilities included:

Code Reviews: Conducted detailed code reviews, providing constructive feedback to help students improve the quality and efficiency of their code.
Mock Interviews: Conducted mock interviews to prepare students for real-life selection processes, focusing on technical questions and common problems they might face.
Weekly Meetings: Organized and led weekly meetings to discuss student progress, resolve doubts, and provide technical and emotional support.
Continuous Assistance: Was available to help with any other needs related to Angular, from understanding basic concepts to solving advanced problems.
This experience not only allowed me to share my knowledge and skills but also helped me develop my own competencies in communication, leadership, and pedagogy.

HARD SKILLS

Angular	RxJs/NgRx	Bootstrap/Tailwind
React/Redux	Javascript	Unit Testing
Html/Css/Scss	Node JS/Express	Figma/Adobe XD
Typescript	Gulp/Webpack	Material UI
Scully	Strapi	Ionic

SOFT SKILLS

Communication	Teamwork	Problem-solving
Creativity	Commitment	Time management
